*Are you ready to install our unit?*

*Let's go >>>*

# 4 steps to install

## STEP 01

Check

- 1) Do the screen is broken ?
- 2) Do the accessories have missing ?

## STEP 02

Test your unit before a full installation.

(Connect the power cable to your car)

## STEP 03

Do the full installation.

## STEP 04

Test the head unit functions.

(FM, SD, USB, Bluetooth, reversing, handbrake, headlight, steering wheel control and etc)

## STEP 02

Test your unit before a full installation.

(Connect the power cable to your car)

1. Double check the size and shape of the center console panel.

2. Prepare the disassembly tools(12). Then plug it to the holes of old radio.

3. After that you can pull the whole unit out from the console.

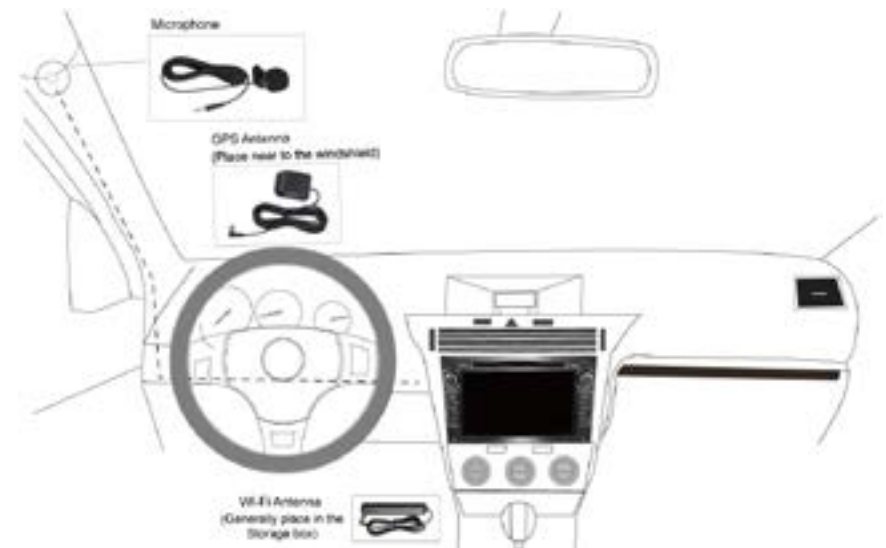

Now you can take out the power cable to connect the head unit and then try to turn it on. If this part is no problem, you can do the remain steps.

## STEP 03 Do the full installation.

4. Connect those wires provided in the package like (1) Power cable with canbus, (2) USB cable, (3) Radio antenna adapter cable, (4) GPS antenna, (5) Wi-fi antenna and (6) External microphone as shown.

5. Plug the head unit into the center console, then place the GPS antenna and microphone as shown. The wires are hidden in the side of pillar trim and led to the head unit.

# STEP 04

## Test the head unit functions.

(FM, SD, USB, Bluetooth, reversing, handbrake, headlight, steering wheel control and etc)
