STEP **04** Test the head unit functions.

# STEPTest your unit before a full<br/>installation.<br/>(Connect the power cable to your car)

After you remove the factory radio, you can take out the power cable to connect the head unit and casually connect the screen cable to the screen

#### How to install the screen?

Connect the factory power cable to our head unit.
Hold the clip of cable and lightly put one side to connect the plug of unit and then completely connect.
Simply place the screen on the unit.

If the unit has no problem, you can move the remain steps.

STEP 03 Do the full installation.

1. Connect those wires provided in the package like (1) Power cable, (2) GPS antenna, (3) Wi-fi antenna, (4) USB cable and (5) External microphone as shown.

## Wiring diagram

# 2. Install the screen again and place the GPS antenna and microphone as shown. The wires are hidden in the side of pillar trim and led to the head unit.

# STEP

# Test the head unit functions.

(FM, SD, USB, Bluetooth, reversing, handbrake, headlight and etc)

#### Remark:

This head unit doesn't have video output slot. It can't synchronize the image of head unit to the screen of backset.

# Wire connection for the amplifier and the subwoofer

Case 2: The 2/4 speakers with an amplifier are connected to the head unit.

Case 3: The 2/4 speakers with an amplifier and the subwoofer with an amplifier are seperately connected to the head unit.

Subwoofer

### **Optional : Install a rear camera**

Below is our rear camera. This will be a reference to teach you how to connect a rear camera to our head unit.

The ASIN of this rear camera has placed in the listing.

## **System Initial setup**

### Set radio location

The default radio country in the unit is Europe, if you are from other country, you need to access the "factory mode (PW: 126) > Radio" to adjust the country.
